

Date	Email	Question 1: What declared species should be a priority for Southern Biosecurity Group? Please pick three from the list below	Question 2: Why have you selected these?	Question 3: What skills, knowledge or resources would help you manage declared species on your property?	Question 4: How would you like us to keep you updated of our progress?	Question 5: What size landholding do you have?	Question 6: Would you like to sign up for the Southern Biosecurity Group Newsletter?	Question 7: Do you have any other comments?
20/09/2021 20:55	tracie@belairag.com.au	Prickly Pear,Rabbits,Wild dogs	Prickly pear is very hard to eradicate, rabbits damage our crops. Wild dogs should always be given a priority to prevent getting out of control.	How to kill prickly pear.	Email	>7500 - 9000 hectares	tracie@belairag.com.au	
21/09/2021 5:25	oceanviewretreat@inet.net.au	Bridal Creeper,Foxes,Rabbits	A difficult choice but these appear to require on-going control and have a great impact in the shire	I have a Hopetoun town block so access to the pesty guide is most helpful. What declared species and where in and around Hopetoun would be useful.	Letter,Southern Biosecurity Group Newsletter	Town block	oceanviewretreat@inet.net.au	Congratulations on the work you do!
22/09/2021 9:07		Foxes,Rabbits,Wild dogs	Financial impact to agriculture	Access to cheap fox baits or bait manufacturers workshops	Southern Biosecurity Group Newsletter	>9000 hectares		
22/09/2021 20:30		Apple of Sodom	For three years I have been trying to get something done about apple of sodom along steerdale rd. I pay the rippoff fee on two titles. It is a waste of bloody time.	Just someone to bloody do something	Dont both. Just keep having a free feed	1 to 50 hectares		Its a ripoff
22/09/2021 23:13		Foxes,Rabbits,Wild dogs	Direct impact on my business	Timely response to dog attacks, dog baiting, fence maintenance, help with rabbit/fix control procedures and follow up to ensure pests do not re-establish	Email,Social Media,Southern Biosecurity Group Newsletter,RAIN enews	>7500 - 9000 hectares		
23/09/2021 7:00	moolyallfarms@gmail.com	Bridal Creeper,Rabbits,Wild dogs	Wild dogs have economic cost to my business. Rabbits increasing and Bridal Creeper taking off after wet year.	Bridal creeper treatment workshop	Rain Enews and CRC newsletters	>9000 hectares	moolyallfarms@gmail.com	
24/09/2021 22:52	mrconnell@westnet.com.au	Feral Cats,Foxes	Native fauna protection	How to bait and trap cats	Email,Southern Biosecurity Group Newsletter	1 to 50 hectares	mrconnell@westnet.com.au	I sincerely wish we could eradicate cats and foxes from the Australian landscape
27/09/2021 19:56	sibford@westnet.com.au	Galah,Starlings,Wild dogs	galahs do damage to trees, wild dogs damage sheep flocks and starlings are birds to keep out of WA	Encourage Governments to empower and encourage professional shooters to shoot foxes, pink and grey galahs and emus and wild pigs. Also employ more government doggers.	Southern Biosecurity Group Newsletter	Town block	sibford@westnet.com.au	Red card for foxes has been a great initiative and very successful.
27/09/2021 21:26		Foxes,Rabbits,Wild dogs	Cause greatest economic loss	Continued effort to control all these species.	Community Spirit	>3500 - 5000 hectares		
28/09/2021 9:10		Feral Cats,Foxes,Rabbits,Wild dogs	as they have significant impact on local economy and environment	best practice information	Website	>3500 - 5000 hectares		
29/09/2021 0:07		Apple of Sodom,Rabbits,Wild dogs	Relevance & possible impact to agriculture industry in our area (wild dogs). Emerging issues that could possibly be controlled (Apple of Sodom). Rabbits have huge environmental impacts and numbers continue to increase. Would also be good to continue with Opuntia control on the Oldfield.	Access to rust for bridal creeper which seems to be worse than ever in Hopetoun.	Community Spirit,Email,Social Media,Southern Biosecurity Group Newsletter	Town block		N/A

29/09/2021 1:28	knappe@bigpond.net.au	Apple of Sodom,Bridal Creeper,Rabbits	All three are rife in the nearby area - we have rabbits coming over from neighbouring properties daily, bridal creeper growing on the block which we are tackling and apple of sodom on vacant land over the road. If I had a fourth choice I would add foxes to the list as well, I have added local sightings to the foxscan website. In addition I've found three bird bodies on the block in recent weeks but not yet sure what is killing them.	Weed control on our block we can handle, but how to deal with rabbits living nearby or whatever is killing birds is more difficult. Any resources would be useful.	Community Spirit,Email	1 to 50 hectares	knappe@bigpond.net.au	Is anybody undertaking weed control on the vacant land between Krystal Park and the turbines (behind Wavecrest)? We walk Coronata Rd to the turbines regularly and notice apple of sodom in the area.
29/09/2021 9:35		Apple of Sodom,Feral Cats,Rabbits	Getting out of control	Education and updates	Southern Biosecurity Group Newsletter	1 to 50 hectares		
29/09/2021 20:18		Briar,Bridal Creeper,Feral Cats,Foxes,House Mouse,Lantana,Phytophthora Dieback,Prickly Pear,Rabbits,Stemless Thistle	You asked answered. Rabbits in and around Hopetoun are out of control!	Free access to organic non toxic baits and herbicides.	Community Spirit	1 to 50 hectares		
4/10/2021 5:00		Bridal Creeper,Feral Cats,Foxes,Starlings,Stemless Thistle,Wild dogs	Dogs and foxes (sheep and fauna); feral cats (fauna); starlings (cereals and horticulture); stemless thistle (horrible!); bridal creeper (flora)	Not sure	Southern Biosecurity Group Newsletter	>2000 - 3500 hectares		
5/10/2021 7:14		Bridal Creeper,Feral Cats,Phytophthora Dieback	Because they have the potential to do the most damage to native flora and fauna	nil	Community Spirit	>50 - 200 hectares		Why are you targeting Apple of Sodom and Prickly Pear when only 1 person identified this as a priority in last year's survey? What evidence-based research do you use to identify target species? If I am required to pay this rate, it would be good to know what you are basing your decisions on.
12/10/2021 0:21	kim.adena@outlook.com	Feral Cats,Foxes,Rabbits	Greatest risk to native marsupials, birds and plant species.	The best way to target any pest species is with ALL available resources (eg. poisons, trapping and humane dispatch)	Email,Southern Biosecurity Group Newsletter,Website	1 to 50 hectares	kim.adena@outlook.com	
14/10/2021 4:54	d.farrell@ravmec.h.com	Bridal Creeper,Boxthorn	It is taking over	Shire help with a dedicated effort to get rid of these, perhaps a busy bee for certain areas a couple of times a year	Email	1 to 50 hectares	d.farrell@ravmec.h.com	I realise there are many threats to bush & wildlife & the difficulty in deciding where to focus.
20/10/2021 6:30		Emu,House Mouse,Rabbits,Sydney wattle	Emu numbers are increasing at an alarming rate causing lots of damage to crops and fencing. Same with rabbits and the virus hasn't slowed them down.	knowing how to effectively control numbers, poisons etc.	Email,Southern Biosecurity Group Newsletter	>5000 - 7500 hectares

21/10/2021 2:25		Feral Cats,Foxes,Galah	Fox and cat - to protect the native birds and animals. Galah, they compete for nesting sights with black cockatoos.			1 to 50 hectares		
21/10/2021 2:26		Bridal Creeper,Emu,Foxes,Snails, boxthorn	obvious! I thought I mentioned these last year but see no mention of them in your Survey??		Southern Biosecurity Group Newsletter	Town block		
21/10/2021 2:29		Foxes,Rabbits,Wild dogs,Politicians and their ignorance	more damage is done by politicians and stupid leaders	leave the wildlife alone, concentrate on imported wildlife, dingoes, wild dogs and rabbits	Community Spirit	>2000 - 3500 hectares		
21/10/2021 2:30		Australian Plague Locust,Rabbits,Wild dogs	wild dogs for farmers killing sheep. Rabbits in town area. Locusts does damage to everyone.	I live in town, have no troubles. Bridal creeper in bush opposite. rabbits down at the CWA.	Community Spirit,Southern Biosecurity Group Newsletter	Town block		
21/10/2021 2:32		Rabbits,Acacia microbotrya (Manna Wattle)	not declared noxious but a major problem at Krystal Park. And has got into the National Park nearby.	more information on how to eradicate Acacia microbotrya.		1 to 50 hectares		
21/10/2021 2:35		Bridal Creeper,Rabbits,Saffron Thistle,Onion Weed - it is and will be very had ro control and will affect future crops and growth.	They need attention - frequently to control them.	recognising problem pests and weeds and how to deal with them.	Community Spirit	Town block		
21/10/2021 3:07		Phytophthora Dieback,Starlings,Wild dogs,Sparrows, onion weeds	I have seen the results if left unchecked. Educate landholders. They are too complacent with pests they are not familiar with.		Community Spirit	Town block		
21/10/2021 3:09		House Mouse,Phytophthora Dieback,Rabbits,Mosquitoes - in plague proportions	rabbit population increasing ; avoid mouse plague		Southern Biosecurity Group Newsletter	1 to 50 hectares		
21/10/2021 3:12		Deer,House Mouse,Rabbits,Not sure if its dodder vine or mistletoe that creeps up into the trees and bushes. It seems to die off, but I'm unsure if it affects the trees. Maybe it is a native climber. Maybe it is already targeted. I've seen it some years completely cover trees and bushes on the Southern Ocean Road (East).	Regarding deer, I believe it would be devastating if they (or goats) got into the Fitzgerald River National Park. Rabbits are not as bad as they were in Hopetoun, but probably need continuous monitoring.	Some good, effective mouse control at plague times, which won't affect other animals which may eat them after they've died by poison.	Southern Biosecurity Group Newsletter	Town block
